APPROVAL PROCESS FOR NEW MEDICATIONS

Our Pharmacy and Therapeutics Committee (the Committee), which is made up of pharmacists and doctors with various specialty backgrounds, reviews the effectiveness and overall value of new medications approved by the FDA on an ongoing basis. The Committee's expertise and advice help us give our members prescription medication options that meet their medical needs and achieve desired treatment goals. Approved medications are added to our list as they're approved by the Committee throughout the year.

While under review, new medications won't be covered by your plan. If it's medically necessary, your doctor can request an exception for coverage. If approved, the medication will be covered at the highest tier.
